## SUMMARY

---

Versatile full-stack web developer with hands-on experience building and deploying robust applications using technologies such as React, Node.js, Express, SQL, and JavaScript. Skilled in designing intuitive user interfaces, developing efficient backends, and integrating databases for real-world applications. Proven ability to work on team-based projects and independently deliver results. Passionate about learning new technologies and solving challenging problems in web development.

## EXPERIENCE

---

### Software Developer

February 2024 – Present

*iSolvRisk Inc.*

*Remote*

- Developed and maintained user-facing applications using React and TypeScript, ensuring high-quality, interactive user experiences.
- Designed and implemented robust backends with PostgreSQL to manage complex data workflows efficiently.
- Collaborated with a cross-functional team of developers, designers, and stakeholders to deliver scalable software solutions.
- Analyzed and visualized data from various sources to support decision-making and enhance application functionality.
- Streamlined team workflows by integrating Agile methodologies and using Git for version control and collaboration.
- Built full-stack features using Flask, React, PostgreSQL, and Docker to improve team productivity and showcase GitHub collaboration trends.
- Implemented secure user authentication and authorization using industry best practices.

### Assistant Kitchen Manager

October 2018 – October 2021

*Charbar?*

*Charlotte, NC*

- Managed daily kitchen operations, including staff scheduling and inventory management.
- Trained and mentored kitchen staff to ensure consistency in food preparation and quality.
- Oversaw food safety and sanitation compliance in adherence to local health regulations.
- Streamlined kitchen workflows to improve efficiency during peak hours.
- Collaborated with management to develop new menu items and specials, boosting customer satisfaction.
- Maintained strong communication with front-of-house staff to ensure seamless service.

## PROJECTS

---

### Business Homepage | *PERN Stack (PostgreSQL, Express, React, Node.js)*

October 2024 – Present

- Developed a fully functional business homepage using the PERN stack to provide users with an interactive and informative experience.
- Built a responsive React frontend that showcases the company's services, values, and contact information.
- Created a robust backend with Node.js and Express, handling API routes and business logic.
- Integrated PostgreSQL to manage business data, including client information and service offerings.
- Implemented responsive design to ensure optimal user experience across devices.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Python, SQL

**Frameworks/Libraries:** React, Node.js, Express.js, Next.js

**Databases:** PostgreSQL, MySQL, Firebase

**Developer Tools:** Git, GitHub, Docker, Postman

**Other Tools/Technologies:** Webpack, Tailwind CSS, REST APIs, CI/CD

## EDUCATION

---

### The Odin Project

Full Stack Web Development Certification

November 2022 – May 2023 Mastered technologies such as React, Node.js, JavaScript, SQL, and PostgreSQL through hands-on projects.
